Product Details

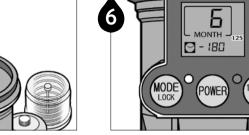

Installation Guidelines

Remove contaminants around the lube point.

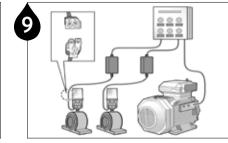

Insert battery pack.

test cycle.

Select the appropriate grease pouch capacity by pressing the 125/250/TEST button. (Omit this process for 60ml and 500ml)

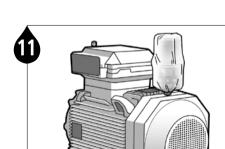

9 - 180

Connect VAC Adaptor/VDC Converter to the control panel. Connect the lubricator's power cable to VAC Adaptor/VDC Converter.

Converter turns on when the control panel powers on.

Install the dust cover over the lubricator for added protection.

Troubleshooting Guidelines

Error: Blank LCD screen

Possible Cause: CPU electrical malfunction or

battery problem

Solution: Replace battery pack or press reset button to restart the lubricator. If the problem persists, contact your supplier.

Error: Low Battery Indication Possible Cause: Rapid power consumption due to improper storage or harsh operating conditions (temperature, humidity, or high backpressure). Solution: Replace battery pack. Store the battery pack in cool, dry place and choose proper

battery type for application.

Error: Excessive Backpressure Indication Possible Cause: Excessive backpressure due to hardened grease, over-lubrication, ruptured lube

Solution: Purge grease into the lube point using a clean manual grease gun to eliminate possible hardened grease that may be causing an obstruction. This will alleviate excessive backpressure. Reduce lube line length if possible.

Wiring Instructions

Warning. Power off the equipment before wiring.

Select appropriate VAC Adaptor/VDC Converter needed for your application.

Wiring Options

- Control Panel
- Other Terminal

VDC Wiring

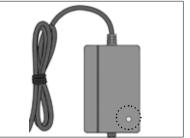

Connect in corresponding polarity (+) to (+) and (-) to (-) for DC powered units.

VAC Wiring

Wires can be connected in any polarity and does not need to match (+) to (+) and (-) to (-).

Note

Product warranty will be null and void if units are incorrectly wired. Installation by an electrician is recommended.

Check that the red LED of the VAC Adaptor/VDC

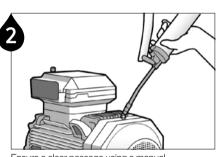

line, long distance remote installation, etc.

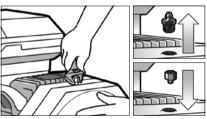

Safety Instructions

Avoid installing in the following places to ensure safety and reliability of VAC Adaptor/VDC Converter.

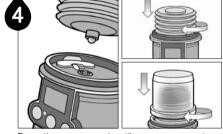

- High vibration areas
- Wet areas
- Where volatile and flammable substances are
- Areas where moisture and fire can be easily reached - Places with poor ventilation and high ambient
- temperatures

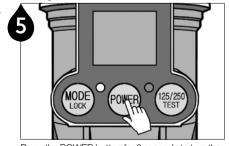

Ensure a clear passage using a manual grease gun. Note1 Remove any hardened grease by purging the lube point with a manual grease gun. Note2 The grease in the equipment and the grease contained in the unit should be the same or compatible.

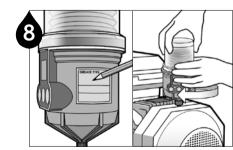

Remove the grease nipple and install appropriate adaptors.

Purge the grease pouch until grease comes out of the tip. Carefully screw the grease pouch in by turning clockwise. Do not over tighten. Refit the top housing on the unit and turn clockwise until it clicks.

Press the POWER button for 2 seconds to turn the unit on.

Press the MODE button to select dispensing period

and hold the TEST button for 2 seconds to run a

Note the installation date and the scheduled completion date of lube cycle on the lubricator using the label provided in the Service Pack for maintenance purposes. Install the unit on the lube point.

Press to set dispensing period 60ml: 1~12 month

125/250ml: 1, 2, 3, 6, 12 month & 15 days (H) 500ml: 1, 2, 4, 6, 12, 18, 24 month & 15 days (H)

Single Point Installation

Extension Tube

Direct mount is always preferable. For applications not allowing any direct mounts, remotely mount the unit using appropriate accessories and keep the distance from the lube point as short as possible.

the unit.

Multi-Point Remote Installation using Progressive Divider Block (2~8 Points)

Remote multi-point lubrication is available with is recommended to test the back pressure of the bearing, lube lines, and divider block after assembly using a grease gun connected to a pressure gauge. Ensure the break-off pressure 30bar (435psi).

- with the appropriate number of points required. For more information on the divider block, please refer to the Multi-Point Remote Installation Manual.
- ▶ Use the lithium battery pack for specific applications such as: extremely cold temperature, extended period mode setting (18 & 24 months), any multi-point or long distance single point (greater than 10ft) for 500ml unit.

Shelf life and Product Warranty Warranty is limited to original defects in material and workmanship and will not cover any collateral damage due to mishandling, abuse and /or any other inappropriate use of this product. Warranty period is 1 year from the date of purchase.
