4. FIRST AID MEASURES

Eye contact
Do not rub your eyes. Immediately flush eyes with plenty of water for at least 15 minutes and call a doctor/physician.

Skin contact
Flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash contaminated clothing thoroughly before re-using.

Inhalation contact
When exposed to large amounts of steam and mist, move to fresh air. Take specific treatment if needed.

Ingestion contact
Please be advised by doctor whether induction of vomit is demanded or not. Rinse your mouth with water immediately.

Delayed and immediate effects and also chronic effects from short and long term exposure
Not available

Notes to physician
Notify medical personnel of contaminated situations and have them take appropriate protective measures.

5. FIRE FIGHTING MEASURES

Suitable (Unsuitable) extinguishing media
Dry chemical, carbon dioxide, regular foam extinguishing agent, spray
Avoid use of water jet for extinguishing

Specific hazards arising from the chemical
Not available

Special protective actions for firefighters
Keep unauthorized personnel out. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. In case of conflagration, use automatic fire sprinkler. Major fire may require withdrawal, allowing the object itself to burn. Avoid inhalation of materials or combustion by-products.
Do not approach the tank surrounded by fire until it is extinguished. Keep containers cool with water spray.

6. ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment and emergency procedures**
Wear proper personal protective apparatus as indicated in Section 8 and avoid skin contact and inhalation.
Ventilate closed spaces before entering.
Do not touch spilled material. Stop leak if you can do it without risk.
Handle the damaged containers or spilled material after wearing appropriate protective equipment

**Environmental precautions**
Prevent runoff and contact with waterways, drains or sewers.
If large amounts have been spilled, inform the relevant authorities.

**Methods and materials for containment and cleaning up**
Large spill: Stay upwind and keep out of low areas. Dike for later disposal.
Notify the central and local government if the emission reach the standard threshold.
Disposal of waste shall be in compliance with the Wastes Control?Act
Appropriate container for disposal of spilled material collected.
Small liquid state spills: Appropriate container for disposal of spilled material collected.
Put the spilled material in an appropriate containers and clean the contaminated area

7. HANDLING AND STORAGE

**Precautions for safe handling**
Avoid direct physical contact.
Since emptied containers retain product residue(vapor, liquid, solid) follow all MSDS and label warnings even after container is emptied.
Avoid contact with incompatible materials.
Refer to Engineering controls and personal protective equipment.

**Conditions for safe storage, including any incompatibilities**
Do not apply direct heat.
Store according to current laws and regulations
Do not apply any physical shock to container.
Keep in the original container.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Exposure limits**
- ACGIH TLV
